PROFESSIONAL SUMMARY

Laravel backend developer with 2+ years of experience building and delivering full-stack web applications across 4 production projects in fintech, healthcare, and education. Hands-on with REST API development, payment gateway integrations, MySQL database design, authentication, and role-based access control. Comfortable taking ownership of backend features from planning to deployment in both onsite and remote teams.

TECHNICAL SKILLS

Backend	Laravel, PHP, REST API Development, API Authentication, Laravel Sanctum, Webhooks, Laravel Queues
Frontend	Livewire, Alpine.js, React.js, Tailwind CSS, Bootstrap, jQuery, AJAX
Database	MySQL, Database Schema Design, Query Optimization, Indexing, Migrations
Payments	Stripe API, PayPal IPN, Escrow Payments, Webhook Handling, Dispute Management
Tools & Other	Git, Postman, Firebase FCM, RBAC, Google Gemini AI, FTP, Agile

WORK EXPERIENCE

Laravel Backend Developer — AKODES IT Solutions, Pakistan (Onsite) Oct 2025 – Mar 2026

Project 1: SKOPIO —Freelance Marketplace with Escrow Payments

- Designed the full MySQL database schema covering 20+ tables for users, jobs, payments, disputes, packages, and activity logs.
- Integrated Stripe escrow payments where client funds are held after a job request and only released once the client approves the completed work, helping reduce payment disputes through escrow-based verification workflows.
- Created an admin-managed dispute system with 3 stages —review, evidence collection, and resolution — handling payment conflicts through structured dispute workflows
- Added Google Gemini AI for URL validation at the registration step, which reduced fake account creation by around 40%.
- Set up a 3-tier membership and package system that controls how many AI tokens each user gets based on their subscription plan.
- Configured email OTP for sign-up and password reset, plus Firebase push notifications for job updates and payment alerts.
- Secured all API endpoints with Laravel Sanctum token-based authentication for both mobile and web users.

Tech: Laravel, MySQL, Stripe API, Laravel Sanctum, Google Gemini AI, Firebase FCM, REST APIs

Project 2: ROOT —Healthcare Management System

- Completed 10+ unfinished CRUD modules in the admin panel for a platform serving 4 user types: Admin, Doctor, Hospital, and Patient.
- Managed the MySQL database structure and applied role-based access control to keep each user type's data separate and secure.
- Integrated PayPal IPN for automatic payment confirmation in the background, removing the need for any manual reconciliation.
- Built a visual family tree feature using Balkan FamilyTree JS to map patient relationships including multiple spouses and different parent types.
- Set up Laravel Sanctum for API security and Firebase push notifications for appointment reminders and system alerts.

Tech: Laravel, MySQL, PayPal IPN, Laravel Sanctum, Balkan FamilyTree JS, Firebase FCM, Bootstrap

Laravel Developer —Freelance (Remote) Feb 2025 – Oct 2025

Hotel Management System —alazkadq.com

- Developed a booking engine with seasonal pricing, reducing booking errors and improving pricing accuracy across room categories.
- Built an automated profit and loss report that pulls together revenue and expenses daily, saving the hotel 70% of manual reporting time.
- Created a staff loan and advance tracking module, cutting accounting errors by 95% and improving payroll accuracy.
- Added a real-time kitchen and inventory tracker linked to guest orders, reducing food wastage by 20%.
- Implemented a secure fund transfer feature between internal accounts using database transactions to ensure no data loss.

Tech: Laravel, MySQL, jQuery, AJAX, RBAC, Bootstrap

Education ERP System — ccm.jadeedems.com

- Developed a daily attendance tracking module for coordinators managing 3+ campuses, cutting manual reporting time by 80%.
- Built a grading module that processed results for 3,000+ students and generated ranking and performance reports for 3,000+ students
- Delivered REST APIs used by both mobile and web clients for real-time data sync across the platform.
- Improved slow database queries and added proper indexing, reducing server load by 50% during exam seasons.

Tech: Laravel, MySQL, Bootstrap, jQuery, AJAX, Git

EDUCATION

Bachelor of Science in Computer Science

Bahauddin Zakarya University
